

JAKOBI BURTON

OBJECTIVE	Seeking a challenging career that compliments and enhances my creativity, passion for problem solving and pursuit of process improvements.	
EDUCATION	M.S Ed. Learning Design and Technology – Dec 2025 (Anticipated) Indiana University, Bloomington, IN B.A., Industrial/Mechanical Technology Minor in Architectural Drafting Indiana State University, Terre Haute, IN	
ACHIEVEMENTS	Best Presentation; Designer Symposium - 2017 Certified SOLIDWORKS Associate – 2016 Altec Innovation Award - 2016 Financial Peace University Graduate - 2011	
GROUPS	Indiana African American Genealogical Group 5013bc – Treasurer (2025 – Present) Assistant Treasurer (2024) Member (2014 - Present) Graduates in Instructional Systems Technology – Member (2024 – Present) Huntwick Community Association Inc – Vice President (2024 - Present) Central Indiana Genealogical Society – Founding Member (2016) Central Indiana SolidWorks User Group – Participant (2015)	
SOFTWARE	HTML 5 – Basic Lectora Desktop – Basic Javascript/Jquery - Basic Camtasia – Intermediate Snagit – Basic/Intermediate Adobe Premiere – Basic Adobe Photoshop - Basic Pinnacle Studio 14 – Intermediate	Power Query – Basic AutoCAD – Intermediate SolidWorks 2022 - Intermediate Teamcenter 12 – Intermediate Qlikview - Intermediate Jira (DTM) – Intermediate Microsoft Word – Intermediate Microsoft Excel - Basic
EXPERIENCE	Graduate Research Assistant Indiana University (SCALE K-12 Research Project)	1/25 – Present Bloomington, IN ➤ Reports progress toward goals to Project Manager on a weekly basis ➤ Collects observational data of curricula implemented in 5 Central and 1 Northern Indiana 6th-12th grade classrooms ➤ Communicates with stakeholders to determine critical project objectives, constraints and criteria ➤ Coordinates with a video production team by providing detailed, comprehensive shot lists to produce high quality video that surpasses stakeholders' requirements ➤ Conceptualizes new video products utilizing assessment data from stakeholders ➤ Improves teacher confidence during implementation by developing more relevant content for professional development available online

Video Production Coordinator

Enigmatic Enterprises Inc (SCALE K-12)

1/24 – 12/24

Indianapolis, IN

- Reported progress toward goals to Principal Investigator on a weekly basis
- Developed promotional video content to increase teacher and student engagement in the project
- Produced short overview videos of curricula to introduce units to new teachers
- Assisted with a summer Curriculum Workshop to familiarize Teacher Fellows with microelectronics, project expectations and objectives.
- Collaborated with a small team to co-author an English Language Arts curriculum integrated with microelectronics education for 6th-12th grade students
- Analyzed video of authors summarizing their curriculum to extract key content
- Identified and organized media assets related to key content for inclusion in final video products

Research Consultant

Purdue University (SCALE K-12)

9/23 – 12/23

West Lafayette, IN

- Collected observational data of curricula implemented in 8 Northern and 3 Southern Indiana 6th-12th grade classrooms which resulted in 60hrs of data
- Digitized engineering notebooks, worksheets, and pre/post assessments of over 250 students which increased the accessibility of the artifacts for future researchers
- Developed and maintained a systematic method of tracking student participation in the research project and visual identification of students captured in photo/video data, while still protecting their identity. This method allows future researchers not familiar with the project to verify a group of students have given their assent to participate prior to publication

Senior Application Engineering Technologist

Altec Industries, Inc

1/16 – 3/23

Indianapolis, IN

- Created how-to videos using original, engaging content to help teammates corporatewide gain more knowledge and familiarity with products/practices
- Developed and maintained multiple Jira (DTM) projects
- Generated new Qlikview objects to provide local team more relevant data
- Converted written requirements of customer expectations into visual representations in the form of 3D models and 2D drawings
- Created solutions in Rapid Continuous Improvement events to promote growth and reduce costs
- Communicated daily with multiple departments of varying disciplines at multiple Altec Facilities to troubleshoot issues and discuss new ideas
- Exceeded internal and external customer expectations by active listening, learning from past mistakes, requesting feedback, being thoroughly consistent, and producing quality results
